

Please make use of lockout/tagout!

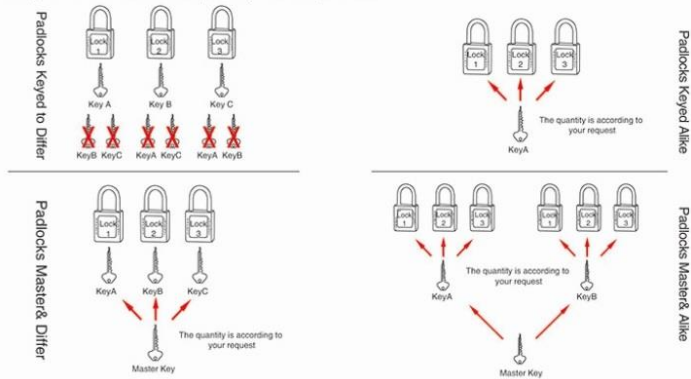

- Prevent wrong operation
- Avoiding accident

Please use the lockout/tagout in following environment

- Pipe valve
- Electrical switch
- Gas supply connection
- The place shows warning
- Other place needs to be limited

Key Management System

- Padlocks Keyed to Differ: Each padlock is keyed differently, one key included with each lock.
- Padlocks Keyed Alike: In one team, each padlock is keyed the same, one key or several keys will open all padlocks. You can order different teams, and different team padlocks can not be opened mutually by the different individual keys.
- Padlocks Master&Differ: Each padlock is keyed differently, but a master key will override and open any of these padlocks. You can order different teams, different team padlocks can not be opened mutually. But a master key can open all padlocks.
- Padlocks Master&Alike: Make different teams of padlocks keyed alike, and if you want to open all locks, just have a master key, which will override and open any of these padlocks.

PL001 - ABS Safety Padlock (master & differ)

- ABS lock body is resistant impact, UV, corrosion, heat and low temperature
- Vertical shackle clearance: 25 mm.

Shackle Size (mm)		
A	B	C
25	20	6

PL002 - ABS Safety Padlock (keyed to differ)

- ABS lock body is resistant impact, UV, corrosion, heat and low temperature
- Vertical shackle clearance: 25 mm.

Shackle Size (mm)		
A	B	C
25	20	6

PL003 - Nylon Safety padlock (keyed to differ)

- Nylon shackle; Non-conductive, non-sparking, dielectric tested
- Be fit for using in the enclosure space such as chemicals, military mining

Shackle Size (mm)		
A	B	C
38	20	6
